FIRE SAFETY **SOLUTIONS**

- Fire Alarm System
- Fire Suppression System
- ICEBALL & Other Fire Extinguishers
- Personal Protective Equipment

FIRE EXTINGUISHERS

ICEBALL extinguishes the fire automatically without Human Assistance

The efficiency of 1 ICEBALL can cover a fire volume of 3 meter radius Standby 24 hours 365 days for 5 years No special training is required to operate the ICEBALL

FIRE EXTINGUISHER CYLINDERS

They can be small but of such a crucial importance, as they are the first line of defense in case of any fire emergency. They are an integral part of the fire safety provisions in any building. Extinguishers are of different types, each with a specific use, therefore selecting an extinguisher for any of the type of fire, is important. The classes of fire are:

A → Ordinary Fires such as wood, paper, & cloth etc B → Flammable liquids & gases such as fuel, paint, oil, & gasoline etc

C → Electrical Equipment D → Metals such as magnesium, phosphorus, and titanium etc

Following are the categories of fire extinguishers in respect to different classes of fire.

Dry Chemical Powder (DCP): DCP can be used on all fire classes.

Water Store Pressure (WSP): This is basically used on class A fires.

Carbon Dioxide (Co₂): This is specifically used on the fires due to electricity or electrical equipment.

Halotron: It is a clean agent and can be used on all fires.

Aqueous Film Forming Foam (AFFF): This is specifically used on class B fires.

Fire extinguishers are often kept in cabinets in order to keep them safe.

ICEBALL SELF ACTIVATING FIRE EXTINGUISHER

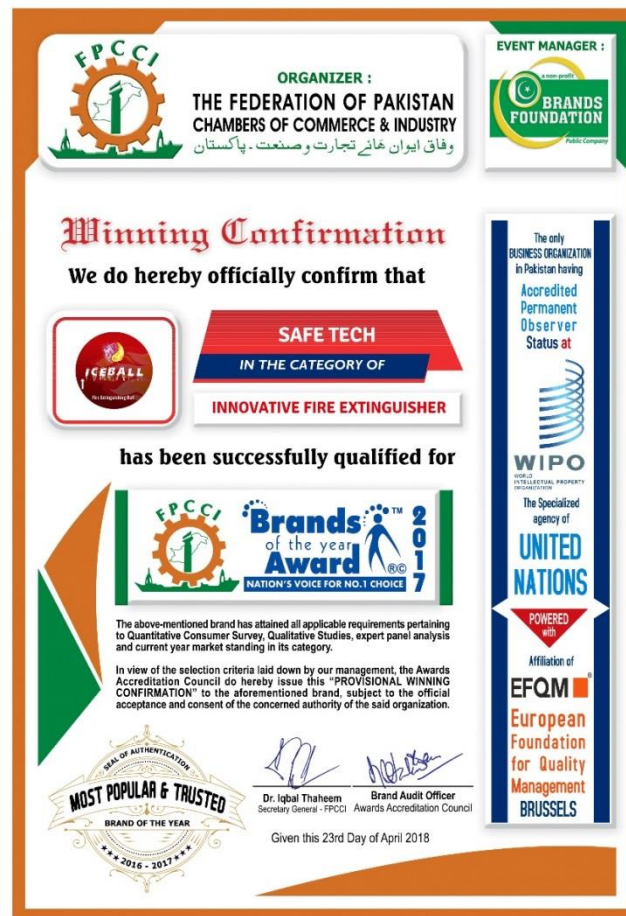

AUTOMATIC FIRE EXTINGUISHER

IMPORTANT FEATURES OF ICEBALL

- ICEBALL extinguishes the fire automatically without human assistance
- Standby 24 Hours 365 Days for 5 years
- Can covers fire volume of 3 meter radius
- No training is required for its operation
- No maintenance is required
- Environment friendly, non-moisture absorption, and non-toxic
- No need to face the dangers of fire

FIRE ALARM SYSTEM

A fire alarm is a unit made of several devices, which uses visual and audio signalization to warn people about a possible fire, smoke, or carbon monoxide occurrence in the area of coverage.

FIRE SUPPRESSION SYSTEM

Fire sprinkler or sprinkler heads are components of a fire sprinkler system that discharges water when the effects of a fire have been detected, such as when a predetermined temperature has been exceeded. Fire sprinklers are extensively used worldwide, with over 40 million sprinkler heads fitted each year. In buildings protected by fire sprinklers, over 99% of fires were controlled by fire sprinklers alone.

We have a wide variety of pendent, flush, horizontal sidewall and concealed sprinklers from Globe Sprinklers, USA for commercial and residential use.

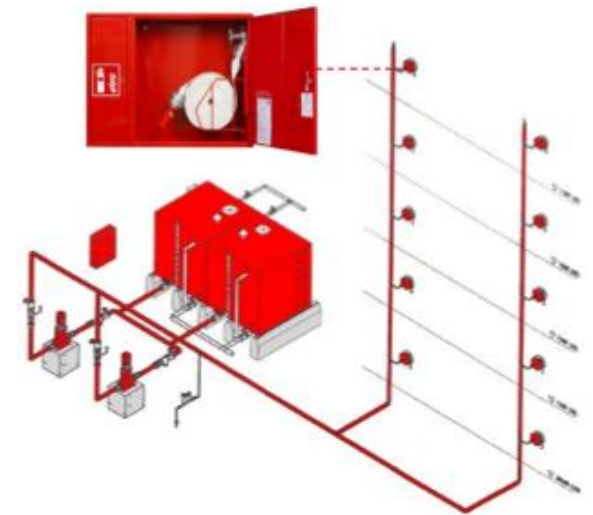

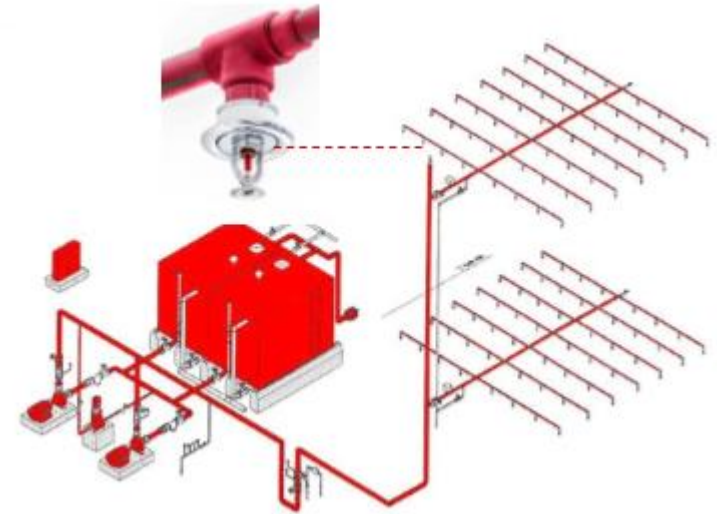

FIRE HYDRANT SYSTEM

In cases of fire, efficient response and downtime of your safety systems can mean the difference between huge operational losses or a salvageable business. Our Hydrant System is the one; you can always count on in such situations.

A fire hydrant system is a safety measure or emergency equipment required in some buildings that comprises a series of components that when assembled together provide a source of water to assist fire authorities in a fire. The components include piping, fitting, Hose reels, Hose cabinets, hydrants & pumps.

FIRE PUMP

Fire pumps are part of an applications water supply and are powered by electricity, diesel or steam. They activate when the pressure in the fire sprinkler systems falls beneath a certain level and provide water flow at a very high pressure to the sprinkler system, which is then disposed onto the fire.

PERSONNEL PROTECTIVE EQUIPMENT

PROTECTIVE CLOTHING & PERSONAL PROTECTIVE EQUIPMENT

Firefighter garments not only have to provide the highest level of wearer protection in their own right, but need to perform equally well when used in conjunction with head-to-toe apparel including helmets, boots, gloves and flash hoods. To achieve this level of compatibility, we have a range from various principals like Bristol & MSA, a class leading ancillary products which provide outstanding head-to-toe protection.

BREATHING MASK

The SoftFeel facepiece of the Comfo Classic Half-Mask Respirator makes this unit dramatically more comfortable. The material increases the softness of both Hycar rubber and silicone, which are the two facepiece materials available with Comfo Classic respirators. The unit's unique face seal design also provides an exceptional fit.

PERSONNEL PROTECTIVE EQUIPMENT

A FIRE BLANKET

A Fire Blanket is a safety device designed to extinguish incipient (starting) fires. It consists of a sheet of a fire retardant material which is placed over a fire in order to smother it. Fire Blanket Small fire blankets, such as for use in kitchens and around the home are usually made of glass fiber and sometimes kevlar, and are folded into a quick-release contraption for ease of storage.

SCBA

A self-contained breathing apparatus (SCBA), sometimes referred to as a compressed air breathing apparatus (CABA) or simply breathing apparatus (BA), is a device worn to provide breathable air in an atmosphere that is immediately dangerous to life or health. They are typically used in firefighting and industry storage.

BUILDING INTEGRATION **SOLUTIONS**

- CCTV Surveillance System
- Access Control System
- Intrusion Alarm System
- Entry, Exit & Parking Solution
- Barriers, Blockers & Bollards

INDUSTRIAL STANDARDS OPEN PROTOCOL (OPC) BASED

Open Platform Communications (OPC) is a series of standards and specifications for industrial telecommunication. An industrial automation task force developed the original standard in 1996 under the name OLE for Process Control (Object Linking and Embedding for process control). OPC specifies the communication of real-time plant data between control devices from different manufacturers.

INDUSTRIAL STANDARDS OPEN PROTOCOL (OPC) BASED

Though most of our attention these days is focused on the transition to IP video technology, it's important to note that analog CCTV security cameras can still be highly effective for many surveillance applications, especially those on a budget.

ASSOCIATED ITEMS / PARTS

- Box & Mini Box Cams
- Mega Pixel Lenses
- Dome Cameras
- Bullet IR Cameras
- Panoramic Cameras PTZ Cameras
- Special Cameras
- LPR Cameras
- Thermal Cameras
- IR Illuminators DVRs & NVRs
